Miami, FL | (702)-972-6556 | [Hector Pulido](#) | [Linkedin](#) | [Github](#) | [Medium](#) |

SOFTWARE ENGINEER

Experienced in Ruby on Rails and JavaScript based programming and a background in building quality full stack websites and applications. I have strong skills in team-building and project management that help any organization achieve a positive impact and good results by developing different technologies.

TECHNICAL SKILLS

HTML, CSS, JavaScript, React, NodeJS, Ruby, Rails, Java, SQL databases

TECHNICAL PROJECTS

Supreme-GOLD [Github](#) | [Demo](#) |

Open-source store web application where the users of this application can perform different actions, including choosing, modifying and buying items.

- Reusable react components and front-end libraries have been implemented so that anyone can create a custom e-commerce from there.
- Implemented Ruby on Rails using full CRUD actions and following REST conventions to redirect incoming requests and perform all of the major functions on the database application.
- Cookies and authentication have been implemented with the Rails API to keep track of users sessions after they have been authenticated.
- Implemented a payment system through a connection with the stripe's API.

Solstice Platform

Marketing platform that manages commercial campaigns that automatically send content to its users through their crypto wallets.

- Developed, tested, and maintained the Web3 Marketing platform to send push notifications to cryptocurrency wallets.
- Built a Dashboard that monitors User Growth, unsubscribes, and Sent Messages using MEAN stack technologies along with Mongoose Node Module for MongoDB data.
- Carried out daily tasks with JavaScript, NoSQL, and Software architecture.

EXPERIENCE

Datacademy

Software Engineer

Miami, Florida

10/2021 - Present

- Meeting with the development team to discuss user interface ideas and applications.
- Developing and implementing highly responsive user interface components using react concepts.
